

Supplementary materials for: Mullin *et al.* 2020:

Plant biodiversity differences between rainforest plots in different stages of recovery in the uplands of the Wet Tropics

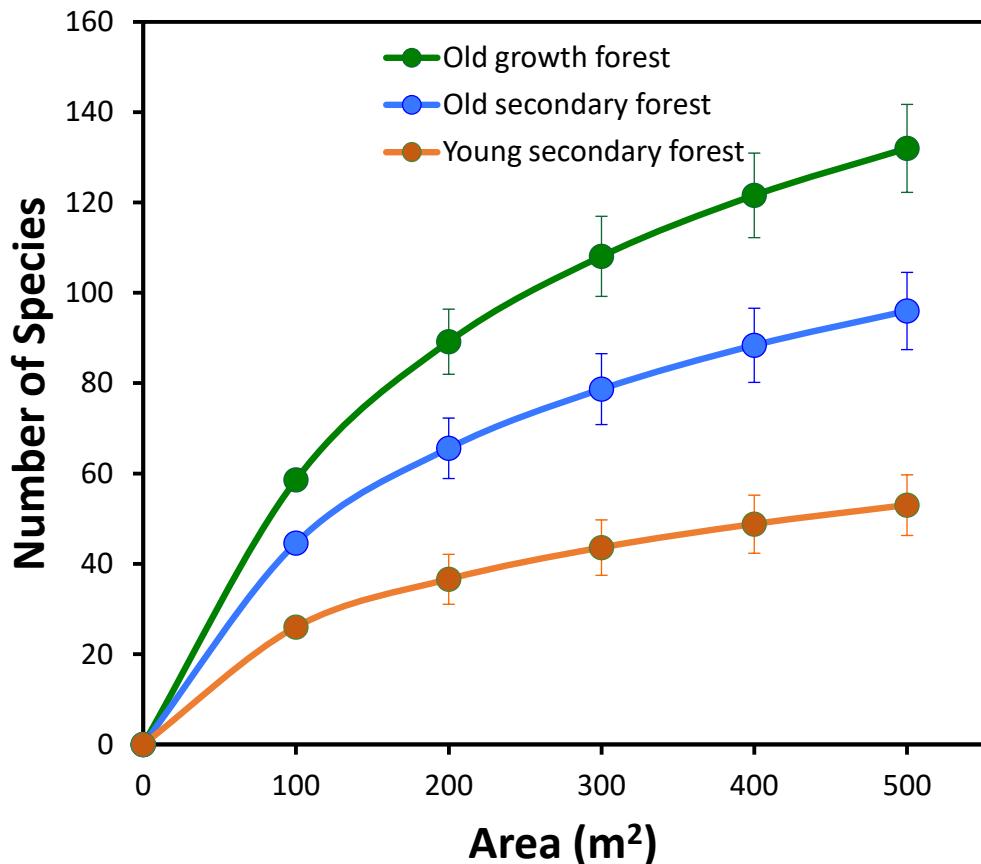

Figure S1. Species-area rarefaction curves (\pm SE) for plant species in Old growth forest, Old secondary forest and Young secondary forest.

The 10m x 10m subplots were used as the major units of area for each vegetation type. The plot in the Abandoned Orchard area was excluded because of differences in plot configuration and biases due to planted trees.

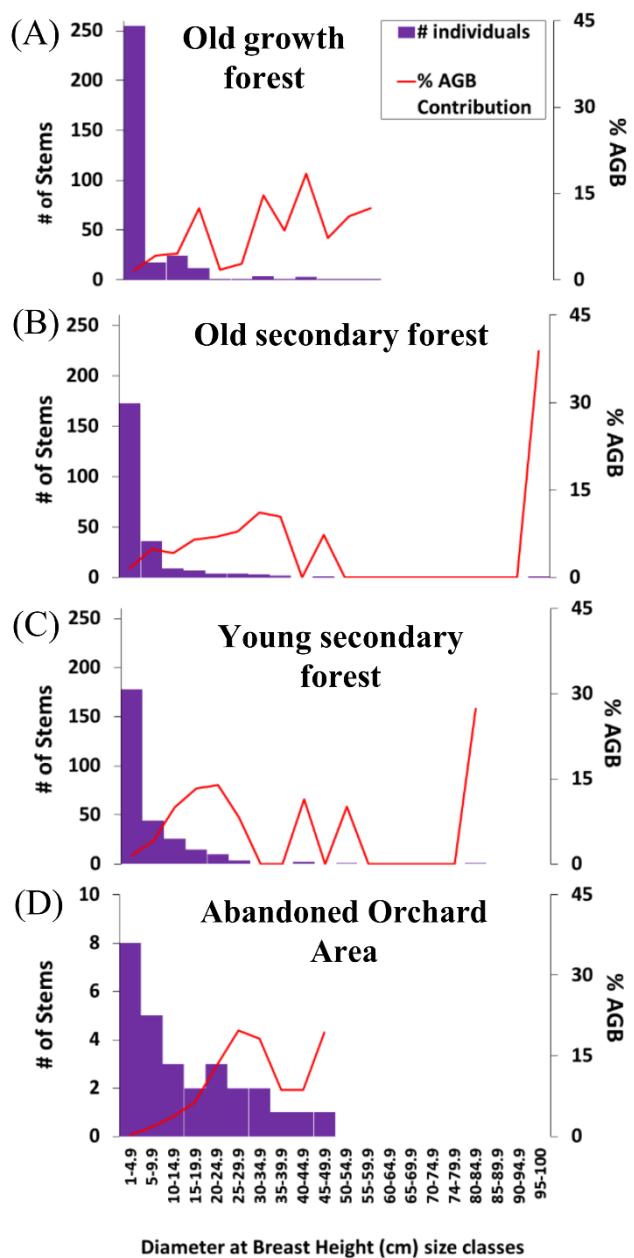

Figure S2. Number of trees within 5 cm stem size classes, with the corresponding percent contribution (trendline) of each stem size class to the total Aboveground Biomass (AGB).

(A) Old growth forest (B) Old secondary forest (C) Young secondary forest and (D) Abandoned Orchard area

Table S1. Species list of plants found within four 500m² vegetation plots in the Centre for Rainforest Studies, School for Field Studies property, Gadgarra, northeast Queensland.

* denotes that the species is not native; # denote that the species was planted; “1” indicates presence. Lifeform abbreviations are: t = tree; s = shrub; h = herb; e = epiphyte; g = graminoid.

Family	Species	Old growth forest	Old secondary forest	Young secondary forest	Orchard area	Biogeography	Phylogeny	Lifeform
Asteraceae	* <i>Ageratum conyzoides</i> subsp. <i>conyzoides</i>	-	-	-	1	non-native	Eudicot	h
Poaceae	* <i>Axonopus compressus</i>	-	-	-	1	non-native	Monocot	g
Rutaceae	# <i>Casimiroa edulis</i>	-	-	-	1	non-native	Eudicot	t
Rubiaceae	# <i>Coffea arabica</i>	-	-	-	1	non-native	Eudicot	s
Asteraceae	* <i>Conyza</i> spp.	-	-	-	1	non-native	Eudicot	h
Verbenaceae	* <i>Lantana camara</i>	-	-	-	1	non-native	Eudicot	s
Fabaceae	* <i>Macrotyloma uniflorum</i>	-	-	-	1	non-native	Eudicot	v
Myrtaceae	# <i>Myrciaria</i> spp.	-	-	-	1	non-native	Eudicot	s
Solanaceae	* <i>Solanum mauritianum</i>	-	-	-	1	non-native	Eudicot	s
Myrtaceae	# <i>Syzygium aqueum</i>	-	-	-	1	non-native	Eudicot	t
Malvaceae	* <i>Urena lobata</i>	-	-	-	1	non-native	Eudicot	s
Poaceae	* <i>Urochloa</i> spp.	-	-	-	1	non-native	Monocot	g
Fabaceae	<i>Acacia celsa</i>	-	1	1	-	endemic to Australia	Eudicot	t
Fabaceae	<i>Acacia cincinnata</i>	-	-	1	-	endemic to Australia	Eudicot	t
Fabaceae	<i>Acacia melanoxylon</i>	-	-	-	1	endemic to Australia	Eudicot	t
Rutaceae	<i>Acronychia acidula</i>	1	-	-	-	endemic to Australia	Eudicot	t
Rutaceae	<i>Acronychia acronychioides</i>	1	1	1	-	endemic to Australia	Eudicot	t
